Cucumber Features

Feature: Account System

Scenario Outline: User login
features/account.feature:2

Given I am in Login page	features/account.feature:3
When I entered <username> in Username	features/account.feature:4
And I entered <password> in Password	features/account.feature:5
And I submit the login form	features/account.feature:6
Then I must see the <result> at navbar	features/account.feature:7

Examples

username	password	result
fortestuse01	a12345A	Welcome, Dont Delete!
fortestuse02	a12345A	Welcome, fortestuse!
fortestuse03	a12345A	Welcome, TestCaseA!

Scenario: Register an account
features/account.feature:15

Given I am in register page	features/step_definitions/register_steps.rb:14
When I entered all the data	features/step_definitions/register_steps.rb:30
And I submit the register form	features/step_definitions/register_steps.rb:40
Then I must see a success message	features/step_definitions/register_steps.rb:44
When I cofirm it	features/step_definitions/register_steps.rb:49
And Browser must go back to login page	features/step_definitions/register_steps.rb:53
And I can successfully login	features/step_definitions/register_steps.rb:61

Feature: Project System

Scenario: After I login, I can see the project list
features/project.feature:2

Given I have an account	features/step_definitions/addproject_steps.rb:15
When I login	features/step_definitions/addproject_steps.rb:20
Then I can see the project list title	features/step_definitions/projectlist_steps.rb:7
And I can see the welcome message	features/step_definitions/projectlist_steps.rb:16
And I can see the add project button	features/step_definitions/projectlist_steps.rb:24

Scenario: In project list, I can add a new project
features/project.feature:5

Given I have an account	features/step_definitions/addproject_steps.rb:15
When I login	features/step_definitions/addproject_steps.rb:20
Then I can click the add project button	features/step_definitions/addproject_steps.rb:26
And I can link to the add project page	features/step_definitions/addproject_steps.rb:34
When I input data	features/step_definitions/addproject_steps.rb:53
Then I can see the Expect days	features/step_definitions/addproject_steps.rb:63
When I submit	features/step_definitions/addproject_steps.rb:67
Then I can see my project on the project list	features/step_definitions/addproject_steps.rb:71

Scenario: In add project page, I can cancel the addition of new project
features/project.feature:15

Given I have an account	features/step_definitions/addproject_steps.rb:15
When I login	features/step_definitions/addproject_steps.rb:20

And I count the rows	features/step_definitions/canceladdproject_steps.rb:6
Then I can click the add project button	features/step_definitions/addproject_steps.rb:26
And I can link to the add project page	features/step_definitions/addproject_steps.rb:34
When I input data	features/step_definitions/addproject_steps.rb:53
Then I can see the expect data in input field	features/step_definitions/canceladdproject_steps.rb:11
When I click the cancel button to cancel	features/step_definitions/canceladdproject_steps.rb:20
Then I go to the project list page	features/step_definitions/canceladdproject_steps.rb:24
And I can see there is no new row	features/step_definitions/canceladdproject_steps.rb:32

Scenario Outline: In project list page, I can edit the project detail features/project.feature:31

Given I have an account	features/project.feature:32
And I have a project	features/project.feature:33
When I login and click the edit button	features/project.feature:34
Then I can see the edit project page title	features/project.feature:35
And I can see the data of the project	features/project.feature:36
When I modify the <attribute>	features/project.feature:37
And I click edit button	features/project.feature:38
Then I go to the project list Page	features/project.feature:39
And I can see the <attribute> that has been modified	features/project.feature:40

Examples

attribute

project_name
project_company
date
status
